

BATHTUB GIN NO.9

Infusion Instructions

- 1** Purchase a bottle of 80 proof & a bottle of 100 proof unflavored Vodka.
- 2** Combine 1-1/2 cups (12 oz) of 100 proof & 1 cup (8 oz) of 80 proof Vodka into a clean re-sealable jar.
- 3** Add one vial of Bootleg's Bathtub Gin No.9 infusion spices, seal and shake.
- 4** Periodically taste and shake your infusion until you're happy with the flavor.

This blend infuses very quickly. Filtering after 8-10 hours will result in a lightly flavored Gin. For a stronger flavor brew 12-14 hours. If the flavor becomes too strong, add more unflavored Vodka until you're happy with the taste.

Have fun experimenting and adapting these instructions to match your tastes.

The brew times listed are merely a suggestion.
Feel free to adjust the time to your liking.

Share your experiments with other mixologists:

- 5** When you are satisfied with the flavor, filter your infusion into a clean bottle using a coffee filter and funnel.

Filtering can take some time. Using a French Press, wire mesh strainer or cheese cloth to perform the initial filtration can help speed things along.
